

GPX

APPLICATIONS/FEATURES:

- The ultimate all-purpose line – now with Dry Tip Technology for the ultimate floating fly line experience
- Made half-size heavier to better load fast-action graphite rods and deliver terrestrials, nymphs, and other bigger, heavier trout flies
- Welded Streamlined Loop – slick and strong – for easy connections and seamless fishing (front)

Available with Dry Tip Technology (3-6 wts) and without (2-9 wts)

WF TAPER CHARACTERISTICS:

- Designed to excel for most flies and conditions
- Medium front taper with slightly oversized tip for high floatation and strong delivery with bigger flies and in the wind
